

PRODUCT FACT SHEET

Positioning beacon

(Sony Beacon D34)

Description

Installed on ceiling surface to let users identify their location within the building.

Product benefits

Nimway positioning beacons serve as a fixed reference point that allows Nimway mobile applications to pinpoint the exact location of the mobile phone inside an office building. All user location data is secure and GDPR compliant, the location is only shared if users allow it, and the feature is turned off by default. Users that opt in to the feature can locate colleagues and find their way around unfamiliar campuses.

The beacons are proven to not interfere with existing Wi-Fi networks in an office building, ensuring your existing IT systems remain entirely undisturbed.
